ABOUT US

At Udai Omni Hospital Orthopaedic, neurological, and trauma care specialty services provide expert care to patients with complex disorders that may arise out of an accident. Trauma injuries are unexpected and frightening for patients and their loved ones. In the moments after injury, people often know that the damage can be life-altering and the medical decisions made afterwards will affect them for years to come.

Fortunately, this team of surgeons have advanced, specialized training and experience in treating seriously injured patients with complex orthopaedic injuries. This helps them make the best medical decisions for every patient who comes through our doors. Such injuries include bone fractures, joint dislocations, and severe damage to soft tissues including muscles, tendons, ligaments, connective tissues, blood vessels, and nerves.

Our orthopaedic surgeons work with a carefully coordinated team of medical specialists in areas such

as Neurology, Neurosurgery, Plastic Surgery, General Surgery & Surgical Gastroenterology, etc. Using the most advanced training, the finest technology and equipment available, and priority surgical scheduling, we're revolutionizing trauma care.
